

Kaushik Rana

+91 (911) 312 9737 - kaushikrana.com - kaushikrana.0603@gmail.com - [LinkedIn](#) - [Github](#)

SKILLS

Languages: Java, Python, JavaScript, Bash Scripting

Frameworks: ReactJs, Django, REST API, Springboot

Databases: MySQL, PostgreSQL, MongoDB

Tools: Grafana, Prometheus, Git, Postman, Docker, AWS, CI/CD, LLM, OpenAI

CAREER HISTORY

Software Engineer

Remote

PriceLabs, Pune, India

June 2024 - October 2025

- Architected a high-volume scraping system using Ruby on Rails to parse and extract over 20 million data points from major OTAs
- Engineered a dynamic IP rotation system using proxy providers, achieving a 98% request success rate
- Reverse-engineered mobile APIs using Burp Suite for traffic interception, increasing data acquisition speed by over 80%.
- Integrated Percona Monitoring and Management (PMM) to oversee backend database, guaranteeing 99.9% uptime and Secured the data extraction pipeline by routing all HTTP requests through TLS-enabled servers.

Software Engineer

Remote

LucidSoftGen, LA, USA

June 2023 - June 2024

- Optimized frontend performance: implemented route-level code-splitting shrinking the JS bundle by 45%
- Hardened auth UX and security with stateless JWT and Axios interceptors, cutting auth-related failures by 85%
- Integrated OpenAI for AI-assisted session notes, reducing manual effort from 60% to 10%
- Launched subscriptions and billing with Stripe, managing recurring plans and invoice generation

PROJECTS

- **Caseopedia – Legal Case Management System** (React, Django, SQL, Firebase, AWS EC2), Built a role-based platform for admins, lawyers, and clients with onboarding, case registration, court/hearing scheduling, document management, task tracking, secure client portal, bulk CSV upload, and hearing reminders; reduced administrative overhead by ~60%. [Live](#)
- **MessageX – WhatsApp-Inspired Messaging Platform** (React, TypeScript, Zustand), Built a production-grade, frontend-only chat app simulating authentication, real-time-like messaging, delivery states, presence indicators, auto-replies, and multi-tab navigation (Chats/Status/Calls/Settings) using centralized state + localStorage persistence. [Live](#)
- **MediCheck – OCR-Based Prescription Management System** (React, Redux, OCR), Developed a secure dashboard where users upload handwritten prescriptions and an OCR pipeline extracts structured data (medicine, dosage, frequency, duration) for editable, searchable digital medical records; improved clarity and long-term prescription tracking. [Live](#)
- **E-commerce Platform** (Next.js, TypeScript), Implemented complete shopping workflows (listing, filtering, product pages, cart, checkout) with optimized data handling and reusable UI components; improved load/filter performance by ~35% and enhanced mobile-first UX. [Live](#)
- **ABalytics – Intelligent ABA Data & Progress Tracking System** (Java, Spring Boot, React, Azure), Built real-time behavioral data capture with AI-generated session notes, learner health tracking, and analytics dashboards (graphs/trends) secured via JWT; streamlined clinician documentation and progress insights across learners. [Live](#)

ACHIEVEMENTS

- Among Top 1.75% on Leetcode with maximum rating 2099 [Link](#)
- Specialist on CodeForces with maximum rating 1600 [Link](#)
- 4 star on codeChef with maximum rating 1860 [Link](#)
- Secured a global rank of 101 TechgigCode Gladiators 2023 out of 3.15 lakh participants.
- Acquired a position among the top coders category in open coding round Code Gladiators 2022.

EDUCATION

Heritage Insitute of Technology

Kolkata, WB, India

B.Tech in CSE (8.8 CGPA)

2020 - 2024
